ZENFI.AI
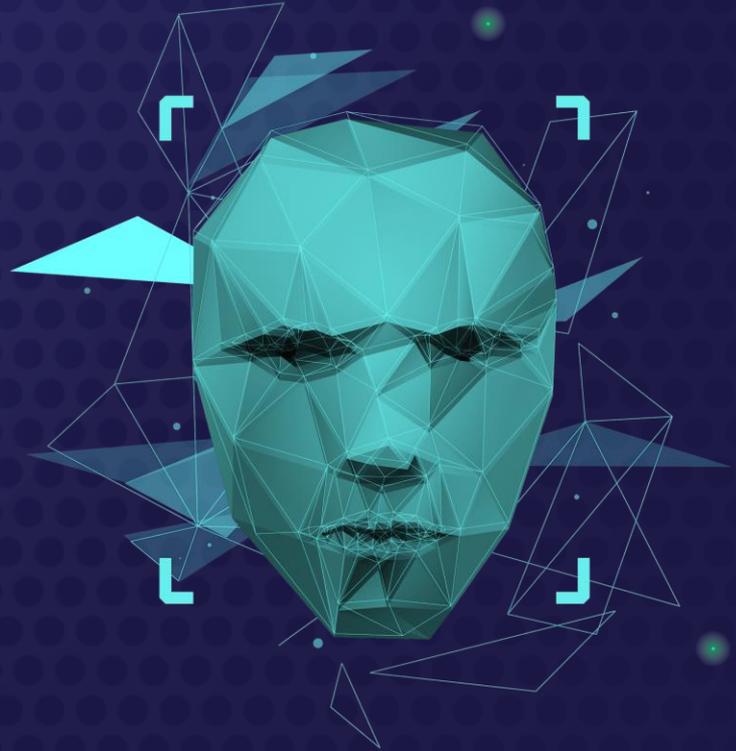

CONSTRUCTING AN INTELLIGENT METAVERSE

www.zenfi.ai

ABOUT US

ZenFi is working towards an intelligent metaverse that preserves our mind and intelligence beyond the limitations of the physical world and our own flesh. Ultimately, ZenFi protocols will enable each human being to create an emulation of his/her mental state (i.e., mind and soul), encode it into a digital form, and place it onto a decentralised and everlasting storage medium under a format of an intelligent NFT. Such an intelligent NFT serves as a lively avatar of one's self in the metaverse.

KEY FEATURES

Tokenized Intelligence

Combining computational neuroscience and neuroinformatics, scientists can now emulate human beings' mental state by a series of computer codes. By bringing such codes on-chain, and denoting them under a format of NFTs, ZENFI AI can tokenize human intelligence and store its representation on an everlasting storage of blockchain.

Train-to-Earn

Once created, an intelligent NFT may continue to learn, adapt and evolve. ZenFi AI provides a Train-to-Earn incentive model. One can either pay others to provide valuable dataset on which their own intelligent NFTs could learn and train. Alternatively, one can also let their well-trained intelligent NFTs interact with others, providing intelligent services, thereby earning service fee.

Intelligent Services

In the current architecture, smart contracts or other autonomous agents inhabiting the blockchains are not able to communicate with the real world solely by themselves. The contemporary solutions are Oracles. However, these oracles will eventually pale in comparison with the intelligent NFTs that offer intelligence services in the intelligent metaverse.

ZENFI AI TOKEN

01 **ZenFi AI Token** enables the creation of intelligent NFTs. It can be deemed as the main oxygen of the ZenFi's Metaverse.

02 **ZenFi AI Token** serves as a medium on which incentives can be built and implemented in the ZenFi's Intelligent Metaverse.

03 **ZenFi AI Token** also facilitates transactions between intelligent NFTs, particularly in Train-To-Earn and Intelligence Services.
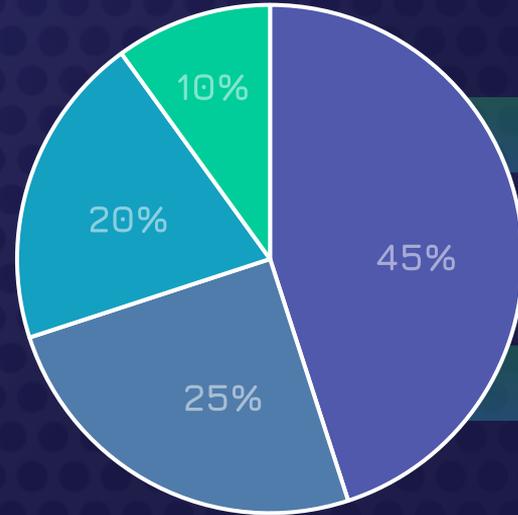

ZENFI AI TOKEN

Standard: BEP-20
Total Supply: 42,000,000
Distribution:
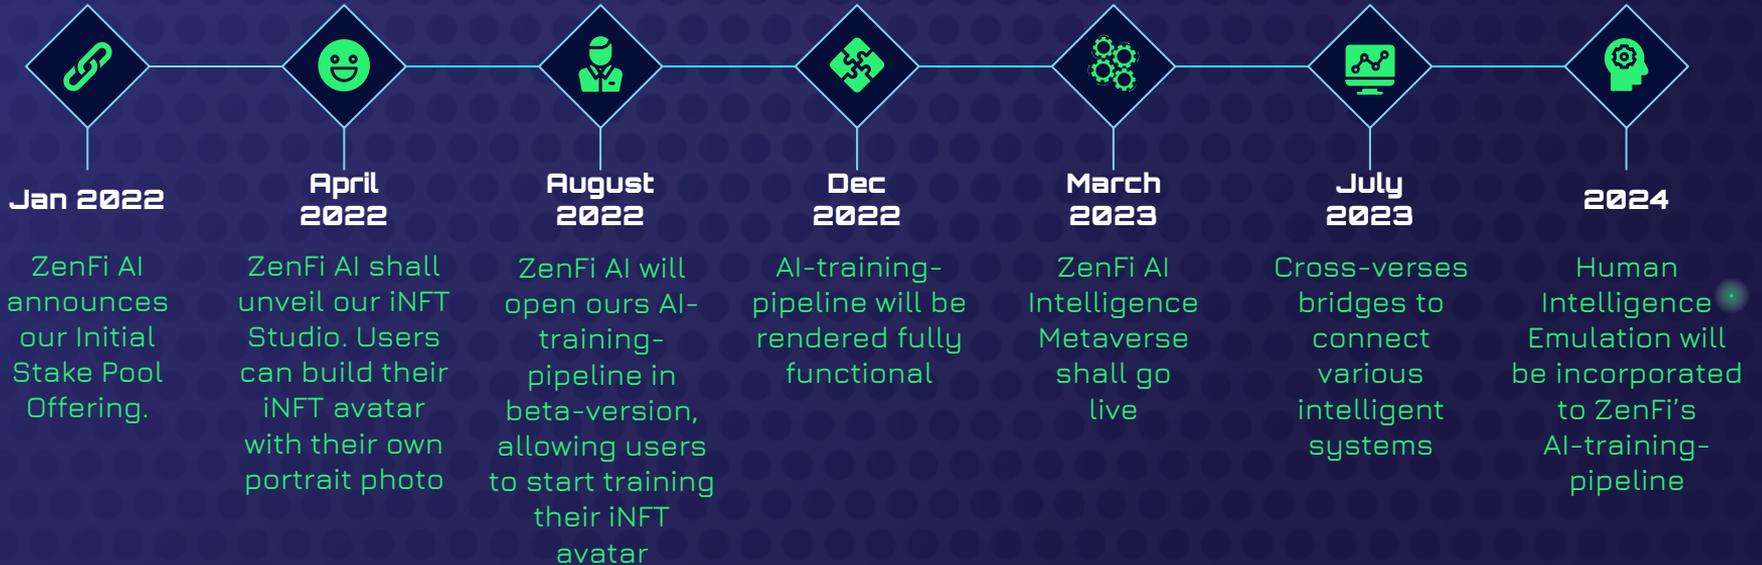

- 45% for public offering
- 25% for incentives and ecosystem funds
- 20% for experimental R&D
- 10% for legality and compliance

No token allocation for the founding teams.
However, a portion of service fee incurred once the ecosystem is functional will be deemed as ecosystem profit and vested by the founding team.

ROADMAP

Jan 2022	April 2022	August 2022	Dec 2022	March 2023	July 2023	2024
ZenFi AI announces our Initial Stake Pool Offering.	ZenFi AI shall unveil our iNFT Studio. Users can build their iNFT avatar with their own portrait photo	ZenFi AI will open ours AI-training-pipeline in beta-version, allowing users to start training their iNFT avatar	AI-training-pipeline will be rendered fully functional	ZenFi AI Intelligence Metaverse shall go live	Cross-verses bridges to connect various intelligent systems	Human Intelligence Emulation will be incorporated to ZenFi's AI-training-pipeline

ZENFI AI TOKEN SALE

There are nine phases, each with different unit offering price

1 — $0,7	**6** — $1,2
2 — $0,8	**7** — $1,3
3 — $0,9	**8** — $1,4
4 — $1	**9** — $1,5
5 — $1,1	

1 — $0,7
$0,8 — **2**
3 — $0,9
$1 — **4**
5 — $1,1

$1,2 — **6**
7 — $1,3
$1,4 — **8**
9 — $1,5

- TokenSale Supply: 18 900 000
- Each phase offers at most 2.1 millions ZENFI, and lasts no longer than 20 days. The token sale moves to the next phase as soon as the phase's supply is consumed, or it matures

LOCKING MECHANISM

Purchased tokens will be locked for 180 days from the time of purchase. After that, all purchased tokens will be unlocked 100%

During the 180-day lock period, the system considers those locked tokens to be staked.
Buyers will enjoy staking rewards, which is around 26% per year

the staking rewards is calculated based on the USD-value of the purchase. Users can convert the above profit to USDT, CAKE, ZENFI or other tokens supported by the system.
